Section 3 HAZARDS IDENTIFICATION	==		
<pre>ROUTES OF EXPOSURE INHALATION of vapor or spray mist. EYE or SKIN contact with the product, vapor or spray mist. EFFECTS OF OVEREXPOSURE EYES: Irritation. SKIN: Prolonged or repeated exposure may cause irritation. INHALATION: Irritation of the upper respiratory system. May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death. SIGNS AND SYMPTOMS OF OVEREXPOSURE Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists. Redness and itching or burning sensation may indicate eye or excessive skin exposure. MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE None generally recognized. CANCER INFORMATION For complete discussion of toxicology data refer to Section 11.</pre>			
Section 4 FIRST AID MEASURES			
<ul> <li>EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention.</li> <li>SKIN: Wash affected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use.</li> <li>INHALATION: If affected, remove from exposure. Restore breathing. Keep warm and quiet.</li> <li>INGESTION: Do not induce vomiting. Get medical attention immediately.</li> </ul>			
Section 5 FIRE FIGHTING MEASURES			
FLASH POINT LEL UEL Propellant < 0 F 0.9 12.8 EXTINGUISHING MEDIA Carbon Dioxide, Dry Chemical, Foam UNUSUAL FIRE AND EXPLOSION HAZARDS Containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.			

RTA9225	page 3
SPECIAL FIRE FIGHTING PROCEDURES Full protective equipment including self-contained breathing app should be used. Water spray may be ineffective. If water is used, fog nozzles a preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when expos extreme heat.	are
Section 6 ACCIDENTAL RELEASE MEASURES	
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED Remove all sources of ignition. Ventilate the area. Remove with inert absorbent.	
Section 7 HANDLING AND STORAGE	
<pre>STORAGE CATEGORY Not Available PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE Keep away from heat, sparks, and open flame. Vapors will accumu readily and may ignite explosively. During use and until all vapors are gone: Keep area ventilated smoke - Extinguish all flames, pilot lights, and heaters - Turn off electric tools and appliances, and any other sources of ignition. Consult NFPA Code. Use approved Bonding and Grounding procedure Contents under pressure. Do not puncture, incinerate, or expose temperature above 120F. Heat from sunlight, radiators, stoves, hot and other heat sources could cause container to burst. Do not take internally. Keep out of the reach of children.</pre>	- Do not f stoves, es. e to t water,
Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION	
PRECAUTIONS TO BE TAKEN IN USE Use only with adequate ventilation. Avoid contact with skin and eyes. Avoid breathing vapor and spr Wash hands after using. This coating may contain materials classified as nuisance partice (listed "as Dust" in Section 2) which may be present at hazardous 1 only during sanding or abrading of the dried film. If no specific are listed in Section 2, the applicable limits for nuisance dusts a TLV 10 mg/m3 (total dust), 3 mg/m3 (respirable fraction), OSHA PEL (total dust), 5 mg/m3 (respirable fraction). Removal of old paint by sanding, scraping or other means may ger dust or fumes that contain lead. Exposure to lead dust or fumes ma brain damage or other adverse health effects, especially in childred pregnant women. Controlling exposure to lead or other hazardous su requires the use of proper protective equipment, such as a properly respirator (NIOSH approved) and proper containment and cleanup. For information, call the National Lead Information Center at 1-800-424 (in US) or contact your local health authority. VENTILATION Local exhaust preferable. General exhaust acceptable if the exp materials in Section 2 is maintained below applicable exposure limi Refer to OSHA Standards 1910.94, 1910.107, 1910.108.	culates levels dusts are ACGIH 15 mg/m3 herate ay cause en or ubstances y fitted or more 4-LEAD

RTA9225 page 4			
RESPIRATORY PROTECTION If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section 2. When sanding or abrading the dried film, wear a dust/mist respirator approved by NIOSH/MSHA for dust which may be generated from this product, underlying paint, or the abrasive. PROTECTIVE GLOVES None required for normal application of aerosol products where minimal skin contact is expected. For long or repeated contact, wear chemical resistant gloves. EYE PROTECTION Wear safety spectacles with unperforated sideshields. OTHER PRECAUTIONS Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Section 10 STABILITY AND REACTIVITY	==		
STABILITY Stable CONDITIONS TO AVOID None known. INCOMPATIBILITY None known. HAZARDOUS DECOMPOSITION PRODUCTS By fire: Carbon Dioxide, Carbon Monoxide HAZARDOUS POLYMERIZATION Will not occur			

RTA	9225

Section 11 -- TOXICOLOGICAL INFORMATION

## CHRONIC HEALTH HAZARDS

Ethylbenzene is classified by IARC as possibly carcinogenic to humans (2B) based on inadequate evidence in humans and sufficient evidence in laboratory animals. Lifetime inhalation exposure of rats and mice to high ethylbenzene concentrations resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice. These effects were not observed in animals exposed to lower concentrations. There is no evidence that ethylbenzene causes cancer in humans.

Prolonged overexposure to solvent ingredients in Section 2 may cause adverse effects to the liver, urinary, cardiovascular and reproductive systems.

Rats exposed to titanium dioxide dust at 250 mg./m3 developed lung cancer, however, such exposure levels are not attainable in the workplace. Reports have associated repeated and prolonged overexposure to solvents

with permanent brain and nervous system damage.

Section 13 DISPOSAL CONSIDERATION	NS		
WASTE DISPOSAL METHOD Waste from this product may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Waste must be tested for ignitability to determine the applicable EPA hazardous waste numbers. Do not incinerate. Depressurize container. Dispose of in accordance with Federal, State/Provincial, and Local regulations regarding pollution.			
Section 14 TRANSPORT INFORMATION			
No data available.

CALIFORNIA PROPOSITION 65 WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. TSCA CERTIFICATION All chemicals in this product are listed, or are exempt from listing, on the TSCA Inventory.			
Section 16 OTHER INFORMATION			

. . . \_

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.
