OCT 26 '90 11:13 MECKELBURG S&DR 414-

### Manufacturer Name And Address:

Weyerhaeuser Company Commercial Door Division Tacoma, WA 98477

# Stave or Lumber Core Door

## PRODUCT IDENTIFICATION

		Telephane Manbers		
	Manufacturing Location	Emergency	information	
Stave or Lumber Core Door	Marshiield, WI Santa Rosa, CA	(707) 584-9663	(715) 384-2141 ext. 315 (707) 584-9663 (803) 943-3115	
<u>'                                      </u>	Varnville, SC	(803) 943-3115	UL Doot Marchfold Madical Unit	

Synonyms: Lumber Core Door, Stave Core Door

Prepared By: Corporate Safety & Health Services, Santa Rosa Safety & Health Dept., Marshfield Medical Unit

Date Prepared: 6/2/89

# 2 HAZARDOUS INGREDIENTS/IDENTITY INFORMATION

- softwood or hardwood total dust
- softwood total dust
- selected hardwood total dust; beech, oak
- non-allergenic total dust
- allergenic total dust
- total dust
- (g) respirable dust (h) free gaseous formaldehyde

#### Appearance and Odor:

Doors with a variety of grain patterns and hues. The products have a slightly aromatic odor.

Wood component may contain alder, ash, aspen, basswood, beech, birch, bubinga, cherry, chestnut, cottonwood, cypress, elm, fir, gum, hamlock, hickory, koa, mahogany (true and false), mansonia, maple, oak (red and while), pine, poplar, spruce, teak and/or walnut

# 3 PHYSICAL/CHEMICAL CHARACTERISTICS

BOILING POINT (F or C):	NAP
VAPOR PRESSURE (mm Hg);	NAP
VAPOR PRESSORE (MIN 19):	NAP
SPECIFIC GRAVITY (H <sub>2</sub> O=1):	0.40 - 0.80
MELTING POINT (F or C):	NAP
EVAPORATION RATE (BUTYL ACETATE = 1):	NAP
EVAPORATION RATE (BUTTLE AGENTS 1)	<0.1%
SOLUBILITY IN WATER:	0
% VOLATILE BY VOLUME @ 70°F:	•

# 4. FIRE AND EXPLOSION HAZARD DATA

Flash Point (Mathod Used): NAP	
Flammable Limits: LEL: See below under "Unusual Fire and Explosion Hazards" UEL: NAP	
Extinguishing Media: Water, carbon dioxide, dry chemical	
Autoignition Temperature (F or C): 400°-500°F	
Special Firefighting Procedures: None	
Unusual Fire and Explosion Hazards: Depending on moisture co and, more importantly, particle diameter, wood dust may explode in t	ii <del>c</del>

presence of an ignition source. An airborne concentration of 40 grams (40,000 mg) of dust per cubic meter of air is often used as the LEL for wood dusts.

## 5 REACTIVITY DATA

#### Stability:

) Unstable

(X) Stable

Conditions to Avoid:

NAP

Incompatibility (Materials to Avoid):

Avoid contact with oxidizing agents, Avoid open flame. Product may ignite at temperatures in excess of 400°F.

#### Hazardous Decomposition or By-Products:

Depending on moisture content, availability of oxygen and temperature, thermal decomposition products include carbon monoxide, carbon dioxide, water, various aldehydes (both aliphatic and aromatic), tars and carbons.

### Hazardous Polymerization:

( ) May Occur Conditions to Avoid: (X) Will Not Occur NAP

## 6 Precautions for Safe Handling and USE

Steps to be Taken in Case Material is Released or Spilled: Not applicable for product in purchased form. Wood, paper or plastic dust(s) generated from sawing, sanding, drilling or routing of this product may be vacuumed or shoyeled for recovery or disposal. Avoid dusty conditions and provide good ventilation. Use NIOSH/MSHA-approved respirator and goggles where ventilation is not possible.

Waste Disposal Method:

Dry land disposal is acceptable in most states if disposed of or discarded in its purchased form. It is, however, the user's responsibility to determine at the time of disposal whether their product meets RCRA criteria for hazardous waste. Follow applicable federal, state or local environmental regulations.

Precautions to be Taken in Handling and Storage:

No special handling precautions are required. Keep in cool, dry place away from open flame. This product may release small amounts of gaseous formaldehyde. Store in well-ventilated area.

Other Precautions:

A NIOSH/MSHA-approved respirator and goggles should be worn when the allowable exposure limits may be exceeded.

# 74 HEALTH HAZARD DATA

Primary Health Hazard(s):

The primary health hazards posed by this product are thought to be due to exposure to wood dust or free gaseous formaldehyde.

#### Primary Route(s) of Exposure:

( ) ingestion

(x) Skin:

Dust

(x) inhalation:

Dust or gas

Acute Health Hazards:

Signs and symptoms of exposure; emergency and first aid procedures:

Not applicable under normal use.

EYE CONTACT:

Gaseous formaldehyde may cause temporary irrilation or a temporary burning sensation. Wood, paper or plastic dust(s) may cause mechanical irritation as a foreign object. Treat dust in eye as foreign object. Flush with water to remove dust particle. Get medical help if irritation persists.

SKIN CONTACT:

Gaseous formaldehyde may cause allergic contact dermatitis in sensitized individuals, resulting in redness, itching, and occasionally hives.

Wood dust(s) of certain species may elicit allergic contact dermatilis in sensitized individuals, as well as mechanical irritation resulting in erythema and

Get medical help if rash, irritation or dermatitis persists.

SKIN ABSORPTION:

Not known to occur under normal use.

High concentrations of wood, paper or plastic dust(s) may cause unpleasant deposit/obstruction in the nasal passages, resulting in runny nose, dry cough and sneezing. Gaseous formaldehyde may temporarily irritate the nose and throat, and may aggravate preexisting respiratory conditions, depending on the level of exposure.

Remove to fresh air. Get medical help if persistent irritation, severe coughing or breathing difficulty occurs.

Medical Conditions Generally Aggravated by Exposure: Wood dust may aggravate preexisting respiratory conditions or allergies.

Chronic Health Hazards:

Gaseous formaldehyde has been shown to cause cancer in certain laboratory animals after long-term exposure to very high concentrations (14+ ppm), far above those normally found in the workplace with this product.

Wood dust(s), depending on the species (for example, iroko, cocobolo), may cause allergic contact dermatilis with prolonged, repetitive contact, and respiratory sensitization after prolonged exposure to elevated dust levels (for example, western red cedar). Wood dust has been alleged to cause nasal/ paranasal sinus cancer (certain European hardwoods; oak and beech).

Carcinogenicity Listing:

(x) NTP: (x) IARC Monographs: (x) OSHA Regulated:

Formaldehyde Formaldehyde Formaldehyde

## 8 CONTROL MEASURES

Personal Protective Equipment

RESPIRATORY PROTECTION:

Not applicable for product in purchased form. A NIOSH/MSHA-approved respirator is recommended when the allowable exposure limits may be exceeded.

PROTECTIVE GLOVES:

Not required. However, cloth, canvas or leather gloves are recommended to minimize potential mechanical irritation from handling product.

EYE PROTECTION:

Not applicable for product in purchased form. Goggles or safety glasses are recommended when machining this product.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT:

Not applicable for product in purchased form. Outer garments may be desirable in extremely dusty areas.

WORK/HYGIENIC PRACTICES:

Follow good hygienic and housekeeping practices. Clean up areas where wood dust settles to avoid excessive accumulation of this combustible material. Minimize blowdown or other practices that generate high airborne-dust concentrations.

#### Ventilation:

LOCAL EXHAUST:

Provide local exhaust as needed so that exposure limits are met.

MECHANICAL (GENERAL):

Provide general ventilation in processing and storage areas as needed so that exposure limits are met.

SPECIAL:

Self-contained breathing apparatus (SCBA) recommended when fighting fire. OTHER: NAP

## THE USER'S RESPONSIBILITY

The information contained in this Material Salety Data Sheet is based on the experience of occupational health and safety professionals and comes from sources believed to be accurate or otherwise technically correct. It is the user's responsibility to determine if this information is suitable for their applications and to follow safety precautions as may be necessary. The user has the responsibility to make sure that this sheet is the most up-to-date issue.
